automated to

Fully Automated

Complete operations are controlled by a patented computerised package specifically developed for Castledara Developments Limited.

Data Retrieval

A wealth of information can be extracted from our unique data acquisition system. Gone are the days when decisions have to be made without supporting information.

Remote Fault Detection and Automatic Communication

Utilisation of supervisory fault detection and monitoring controls. All problems are automatically communicated to clients.

Facilities Mangement

Supporting clients throughout the project is important, maintaining that support after completion is fundamental to our partnering philosophy.
